To solve this puzzle, you must first solve the crossword, both figuring out all of the words, as well as what spaces they go in. Once you’ve completed the crossword, you can look at the answers that have numbers next to them. For each number in the sequence, if you “light up” the two answers they correspond to, you will get a semaphore position on the crossword. Converting each semaphore to a letter, and then ordering them by the number in the sequence gives you “Infrared”
