

# Incredibly Complicated Encryption

Liam Thomas

Hey, we got a little icebreaker for you here: One of our digital anomalies escaped containment on our machines, and it's set itself up in a server with defenses protecting it. You'll need to break down the barriers, slip past the sentries and open the code gates. We'll need to know how much it'll cost us to break through everything and get in.

Mind Control Research (7) VS Mercantile Snake Stick (8)

Beauty in Egyptian (3) VS Boring or Bland, as in Ice Cream (7)

Elephant Hook (6) VS Roman Emperor's Barrier (8, 4) AND Burning Internet Safeguard (4, 4)
