

Black Box

JAKE OLKIN, LIAM THOMAS, TOM WILDENHAIN

Each of the 6 answer words used in this meta correspond to the names of real cities. The elevation column is the elevation of each city in meters. Use the Longitude/Latitude markings to plot each city on the island map and draw a path between the points. The letters the path crosses through reveal the solution **ASHES**, indicating that the plane crashed due to ashes from a volcano.
